HELPFUL INFORMATION

This Parts Catalog covers only the PTO Horse Model TROY-BILT® Roto Tiller-Power Composter built by TROY-BILT Manufacturing Company. This catalog is part of our policy of "trying to be of genuine service to our customers." Please look it over occasionally . . . we think it will be of help to you.

If you have any questions, please write us or call. We'll gladly give you all the help we can. Thank you.

HOW TO FIND A PART

To find a part, locate the page number of the illustration of the part you seek in the Table of Contents. Note that some parts may be shown on more than one illustration because they are also used with other assemblies on your tiller.

Each illustrated part has a REF. NO. right next to it. This REF. NO. also appears in the first column of the parts list that accompanies the illustration.

The second column of the parts list shows the PART NO. given to that particular part. USE THIS PART NO. TO ORDER THE PART.

Under the DESCRIPTION column, the capitalized words show the name of the part or assembly. Additional descriptive information is often given to help identify the location or function of the part.

The fourth column shows how many (QTY.) of each part is used in the illustration. If a part is used more than once on the tiller, you can determine how many times and where on the tiller by looking at the Numerical Index of parts in the back of this catalog. This index shows the page and Ref. No. of all the parts. Thus, if you know the part number, but do not know its name, location, or use, the Index refers you to the proper page and reference number.

The fifth column shows whether or not a part REPLACES an earlier part number. Sometimes it reflects a simple number change, or an improvement in design or materials. In these instances, the parts are interchangeable, unless otherwise noted in the Description column.

HOW TO ORDER PARTS

Parts for your tiller may be ordered from your local servicing dealer or directly from us (see factory address and telephone information on back cover). When ordering parts the following information is required:

1. The Model Name and Serial Number of your tiller.
2. The Model Name and Horsepower rating of your engine.
3. The Part Number of the part you need.
4. The Part Description.
5. The Quantity needed.

Pre-payment for parts may not be necessary unless the total order reaches a certain amount. Details on our payment plan and current pricing will be gladly furnished upon request.

IMPORTANT: All engine parts should be ordered from your local authorized engine dealer as we do not stock engine parts. Look in the Yellow Pages of your telephone directory under "Engines-Gasoline" for the name of your nearest service dealer. If you have any difficulty in finding an authorized service dealer, please contact our Technical Service Department for assistance.

PLEASE NOTE

Some replacement parts may vary slightly in shape, color, or texture from the original parts. This is because certain parts are supplied to us by more than one manufacturer. Please be assured, however, that all parts must conform to our rigid quality specifications, and any slight variations will not affect the fit or performance of these parts in your tiller.

EXPLANATION OF "LEFT SIDE" AND "RIGHT SIDE"

Left and Right sides of the tiller are determined by standing in the operator position and facing in the direction of forward travel.
